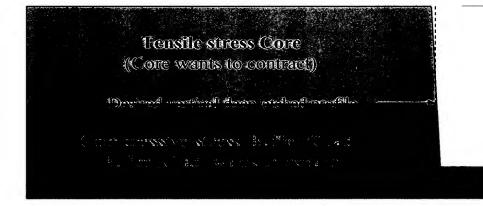

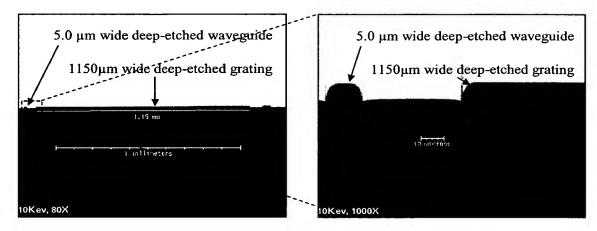

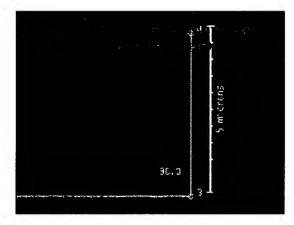

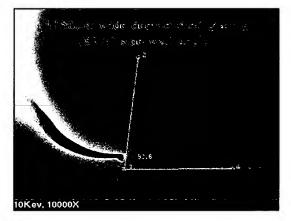

Figure 13

The relative position between an isolated 5.0μm wide deep-etched waveguide and its neighboring 1150μm wide deep-etched grating at two different magnifications.

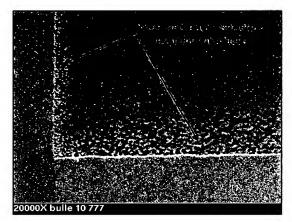

The side-wall of the 5.0µm wide deepetched waveguide facing the neighboring grating has a slope of about 90°.

The side-wall of the 1150µm wide deepetched grating facing the neighboring deep-etched waveguide has a much smaller slope of about 84°.
